

Diego Villagran Salazar

Data Science Student | Machine Learning Engineer | Python Developer

Email: diegovillasal@gmail.com | Phone: +52 55 7207 1183

Portfolio: www.dvillagrans.dev | LinkedIn: linkedin.com/in/diego-villagrans | GitHub: github.com/dvillagrans

Education

Bachelor of Science in Data Science

Superior School of Computer Science (ESCOM-IPN)

2022 – 2026

Mexico City, Mexico

- Maintained GPA of 8.5/10.0 while completing 45+ credit hours in advanced coursework
- Specialized in Machine Learning, Statistical Modeling, Big Data Analytics, and Python Programming

Professional Experience

AI & Automation Inter

Eyenet

April 2025 – Present

Remote

- Designed and deployed end-to-end automation workflows using n8n and Python, reducing manual processing time by 70 percent
- Implemented AI/ML deployment with OpenAI and Gemini APIs for document processing, achieving 60 percent reduction in data capture errors
- Built production-ready Docker infrastructure with PostgreSQL databases, automated CI/CD pipelines, and Telegram alerting systems
- Developed intelligent data processing pipelines using machine learning algorithms, improving accuracy by 45 percent
- Architected scalable microservices architecture with Redis caching and MongoDB integration, handling 10,000+ daily transactions

Projects & Research

AI Audio Transcription Pipeline with Intelligent Summarization

Personal Research Project

2025

- Built production-scale AI/ML deployment using Python, Faster-Whisper AI, achieving 95-98 percent accuracy across 13+ languages
- Developed intelligent summarization system with Ollama Llama 3.1:8b, generating optimized summaries with 20-35 percent compression
- Architected full-stack solution processing 15+ GB of audio data using React, TypeScript, Express.js, and PostgreSQL optimization

Enterprise Services Orchestrator & Monitoring System

DevOps Infrastructure Project

2025

- Designed scalable DevOps orchestration platform managing 20+ Docker services, PostgreSQL/MongoDB databases, and Linux servers
- Implemented automated backup and disaster recovery system with Python scripting, ensuring 99.9 percent uptime optimization
- Developed real-time monitoring dashboard with Telegram bot integration, enabling remote cloud infrastructure administration
- Optimized database queries and system performance using SQL optimization techniques, reducing resource consumption by 35 percent

Technical Skills

Programming & DevOps: Python, SQL, JavaScript, Java, Bash Scripting, Docker, Linux, CI/CD, Git/GitHub

Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, Keras, XGBoost, BERT, Neural Networks, Deep Learning, NLP, AI/ML, OpenAI, Gemini, Faster-Whisper AI, Ollama Llama 3.1:8b

Cloud & Infrastructure: Azure, AWS, Databricks, Cloud Infrastructure, PostgreSQL, MongoDB, MySQL, Redis, ETL Pipelines, Apache Spark

Data Analysis & Optimization: Statistical Modeling, Data Mining, Predictive Analytics, A/B Testing, Database Optimization, Research, Data Visualization (Power BI, Tableau, Matplotlib, Seaborn)

Certifications

Google Cloud Platform | Google AI Essentials | Google Data Analytics Professional

Generative AI with LLMs | Advanced Excel | Oracle Next Education (Back-End Development)

Languages

Spanish: Native proficiency | English: B1
