Hybrid-ready

Summary

Production-focused Data Science student (ESCOM-IPN, 2026). Experience building AI pipelines and analytics for decision support: LLM-based extraction (200+ docs/day, 92% accuracy) and high-throughput data systems (10K+ transactions/day).

Experience

2025–2026 **AI & Data Automation Analyst**, *EyeNet*, Remote

- Built LLM-based extraction pipelines (OpenAI/Gemini) achieving 92% accuracy across 200+ docs/day.
- Implemented data-quality CI/CD and alerting, catching >95% of issues pre-production.
- Developed data infra (Postgres, MongoDB, Redis) supporting 10K+ daily transactions.

Select Projects

2024 **AML / Compliance Analog**

Prototype clustering and anomaly-detection workflows for transaction monitoring scenarios.

2024 **COVID-19 Risk Profiles**

Clustering on 30M+ records to derive 9 risk profiles; interactive dashboard.

Skills

Data Python, SQL, Pandas, Scikit-learn

ML XGBoost, TensorFlow, PyTorch, Clustering

Infra Azure Databricks, Docker, AWS, Postgres
