Hybrid-ready

Summary

Production-focused Data Science student (ESCOM-IPN, 2026). Build AI and automation systems that reduce manual work, scale to thousands of daily requests, and deliver measurable business outcomes.

Experience

- 2025–2026 **AI & Automation Intern**, EyeNet, Remote
- Built document automation pipeline (Python, n8n) reducing manual processing by 65% (300+ docs/week).
 - Automated structured data extraction using OpenAI/Gemini (92% accuracy).
 - Architected microservices (Postgres, Redis, MongoDB, Docker) handling 10K+ daily requests.

Selected Projects

- 2024 **TimeUp - Time Tracking SaaS**
Reduced payroll admin work by 80% for SME clients; implemented payroll automation and dashboards.
- 2024 **NYC Ride-Hailing Analytics**
Predictive model ($R^2 > 0.85$) and Streamlit dashboard from 30M+ records.

Skills

Data	Python, TensorFlow, PyTorch, Scikit-learn, NLP
Infra	Docker, Kubernetes, AWS, Azure, Postgres, MongoDB
Automation	n8n, ETL, CI/CD
