

Diego Villagran Salazar

Data Analyst | SQL | BI Dashboards

diegovillasal@gmail.com | +52 55 7207 1183 | www.dvillagrans.dev | [LinkedIn](#) | [GitHub](#)

Professional Summary

Data Analyst with strong SQL, data cleaning, and dashboarding skills. Experience turning unstructured data into analysis-ready tables and building automated datasets for reporting. Comfortable with A/B testing, statistical analysis, and KPIs to drive decisions. Built pipelines that process 300+ documents per day with 92% accuracy and dashboards tracking 25+ operational metrics. Seeking an analyst role focused on impact through clear, reliable insights.

Education

Bachelor of Science in Data Science

Superior School of Computer Science (ESCOM-IPN)

2022 – 2026 (December)

Mexico City, Mexico

- Maintained GPA of 8.5/10.0 while completing 45+ credit hours in advanced coursework
- Focus areas: Data Analytics, Statistical Modeling, SQL, Data Visualization

Professional Experience

AI & Automation Intern

EyeNet

April 2025 – Present

Remote

- Built automated ingestion to transform 300+ documents per day into structured tables; achieved 92% extraction accuracy and reduced manual work by 65%
- Designed SQL datasets and views for reporting on PostgreSQL and MongoDB; improved time-to-insight for operational stakeholders
- Implemented KPIs and monitoring for data freshness, error rates, and throughput; detected 95%+ issues before production impact
- Integrated external APIs (OpenAI, Gemini) to enrich datasets and standardize text fields for analytics

Projects

Qalma - Product Analytics for Real-time Signals

Analytics Project

2025

- Built analysis-ready datasets for EEG events and sessions; designed metrics for engagement, session quality, and outcomes across 50+ users
- Developed pipelines for time-series aggregation and cohort analysis; stored curated tables in Supabase/PostgreSQL
- Created simple dashboards and reports to share insights with product and engineering

Operational Metrics Dashboard

Monitoring & Reporting

2025

- Created dashboards tracking 25+ metrics (latency, error rates, throughput) with Grafana and Prometheus, enabling proactive actions
- Performed load testing and analysis using Apache Bench; recommended changes that reduced median latency by 40%

Technical Skills

SQL & Analytics: SQL (PostgreSQL), Joins, Window Functions, CTEs, Data Cleaning, A/B Testing, Statistical Modeling

BI & Visualization: Power BI, Tableau, Dashboard Design, Reporting

Data Engineering for Analytics: ETL Pipelines, Batch Processing, Data Modeling (Star Schema, Data Marts)

Python for Analysis: Python, Pandas, NumPy, Jupyter

Data Sources & Tools: PostgreSQL, MongoDB, Redis, Git, Docker (basic)

Certifications & Languages

Certifications: Build a Data Warehouse with BigQuery, Engineer Data for Predictive Modeling with BigQuery ML, Manage Kubernetes in Google Cloud, Google AI Essentials (Coursera)

Languages: Spanish (Native proficiency), English (B2 in-course)
